

OCTOBER 1st, 2nd and 3rd 2024

SEMINAR.

Interventions in archaeological sites with previous restorations

Sample collection from the Casa del Anfiteatro of Mérida.
Photography: Ioanna Ruiz de Torres Moustaka

> PROGRAMME

PRESENTATION

The conservation and restoration of archaeological sites has been developed with greater intensity since the beginning of the last century. Interventions carried out in the past have endured the passage of time and, on numerous occasions, require updating due to both the aging of the materials used and changes in intervention criteria.

The need to review past conservation and restoration measures and assess their results over the medium term is proposed, in order to draw empirical conclusions that will assist in future decision-making.

The seminar is structured around three thematic axes.

The first focuses on the documentation of past restorations.

The second thematic block will present case studies of interventions in sites with historical restorations. Topics will include issues such as the reintegration of previous restorations and the dilemma of which elements to conserve and which to remove.

Finally, the third block aims to address the challenges of restoring previously restored sites. In this context, the discussion will focus on the compatibility of materials used in the past with the original remains and with the products used nowadays.

SCIENTIFIC COORDINATION

Valerie Magar and Tomás Meraz.
International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM)

Ana Laborde Marqueze and Ioanna Ruiz de Torres Moustaka. Institute of Cultural Heritage of Spain (IPCE)

TECHNICAL COORDINATION

Marta Souto Martín, Iratxe Peñafiel Flores and Nieves Sánchez García. Institute of Cultural Heritage of Spain

DATES

October 1st, 2nd and 3rd 2024

DURATION

12 hours

TIMETABLE

De 15.00 a 18.30 hours (CET)

VENUE

ICCROM headquarters, Via di San Michele 13
– Rome, Italy. 4th floor

Online via Zoom® platform

SEMINAR. Interventions in archaeological sites with previous restorations

OBJECTIVES

The seminar aims to address the following issues related to the restoration of archaeological sites with a long history of such interventions:

- Previous conservation-restoration interventions: Methodology and materials common across different decades. Typologies and proposed classification
- Intervention in historical restorations. Issues and challenges. Ethical considerations regarding their removal or preservation
- Compatibility of materials used in the past with contemporary products. The concept of retrievability and its focus on archaeological structures
- Past restorations as a determining factor in current interventions
- Maintenance of archaeological sites with past conservation and restoration interventions

TARGET AUDIENCE

Professionals related to the conservation and restoration of archaeological sites, site managers, museologists, architects, students, etc.

REGISTRATIONS AND CERTIFICATES

Attendance to this course is free, but requires prior registration.

The registration period will be open until September 30, 2024, or until the available spots for in-person attendees are filled.

Online assistance: 400 participants online.

Registration will be required for each day of the webinar. The registration form is available at the following address:

https://iccrom-org.zoom.us/webinar/register/WN_rfmMCCm5SUGSxp_oe5UTyQ

To participate, it is necessary to have the Zoom® videoconferencing application. Accepted participants will receive the link/invitation to access the conferences virtually. A maximum of 1,000 participants is allowed. Certificates of attendance or participation are not provided for this activity.

In-person attendance: until full capacity.
